

# BP-SeeEMV:

Your EMV Training and Diagnostic Tool

## Does your company handle EMV, NFC, or Mobile Payments? Do you need to grow or retain this knowledge?

Big changes are taking place in electronic payments processing. EMV chip card technology is now used in every major economic region of the world, bringing with it an evolution in payment systems that increase security, reduce fraud and enable use of value-add applications.

There is a growing need for experienced EMV professionals across the payments industry to understand, deliver and support this technology.

## EFTlab's BP-SeeEMV can help you and your business quickly come up to speed on EMV.

BP-SeeEMV provides a visual representation of all steps involved in an EMV transaction, making it easy, fast and efficient to learn EMV Chip Card Technology. BP-SeeEMV will help you save on training resources and will help you deliver your chip card technology projects on time.

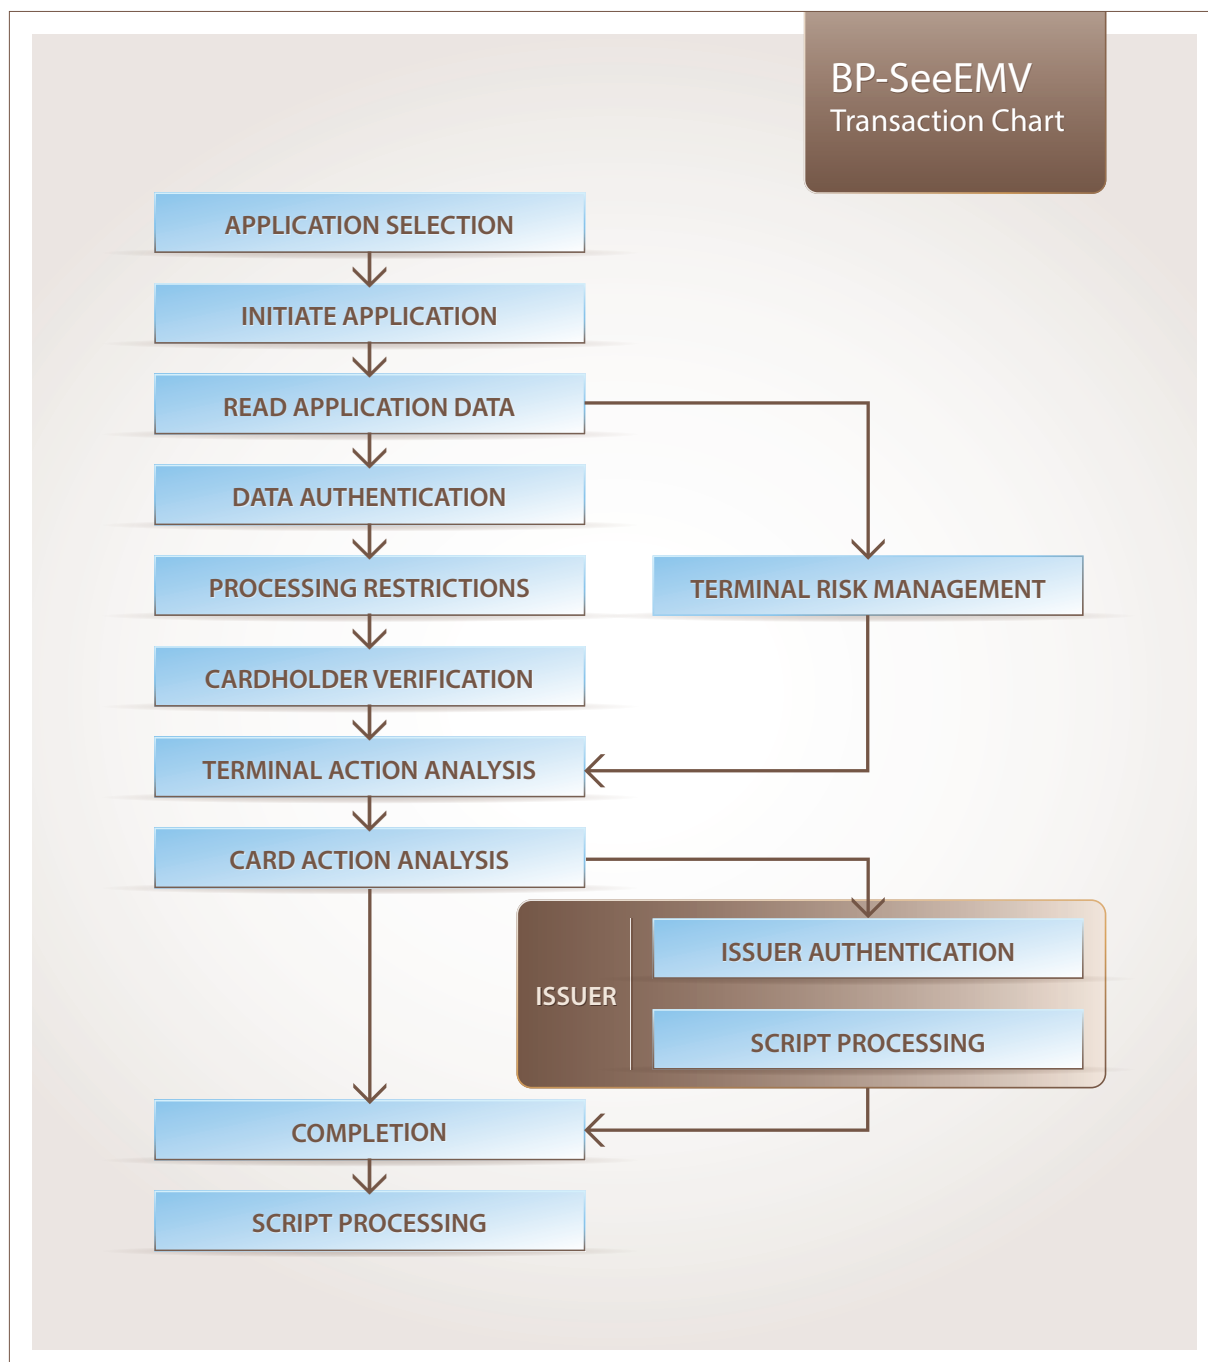

### BP-SeeEMV can be used as:

- ✓ A training tool for understanding the EMV payment process
- ✓ A diagnostic tool for checking the behavior of an EMV payment applications or EMV cards
- ✓ An aid for developing and validating EMV applications

### It is suitable for use by:

- ✓ Card Issuers - to verify the behavior of EMV card applications
- ✓ Acquirers - to verify the configuration of their EMV terminals
- ✓ Technical Consultants - to test and troubleshoot EMV transaction flows
- ✓ Training Consultants - as a hands-on teaching tool for EMV payments training
